

From EMIF to EHDEN: scaling up the big data ecosystem across Europe

Nigel Hughes

EHDEN Project Leader/Co-Coordinator
Scientific Director, JCI Patient Data for Research, Janssen

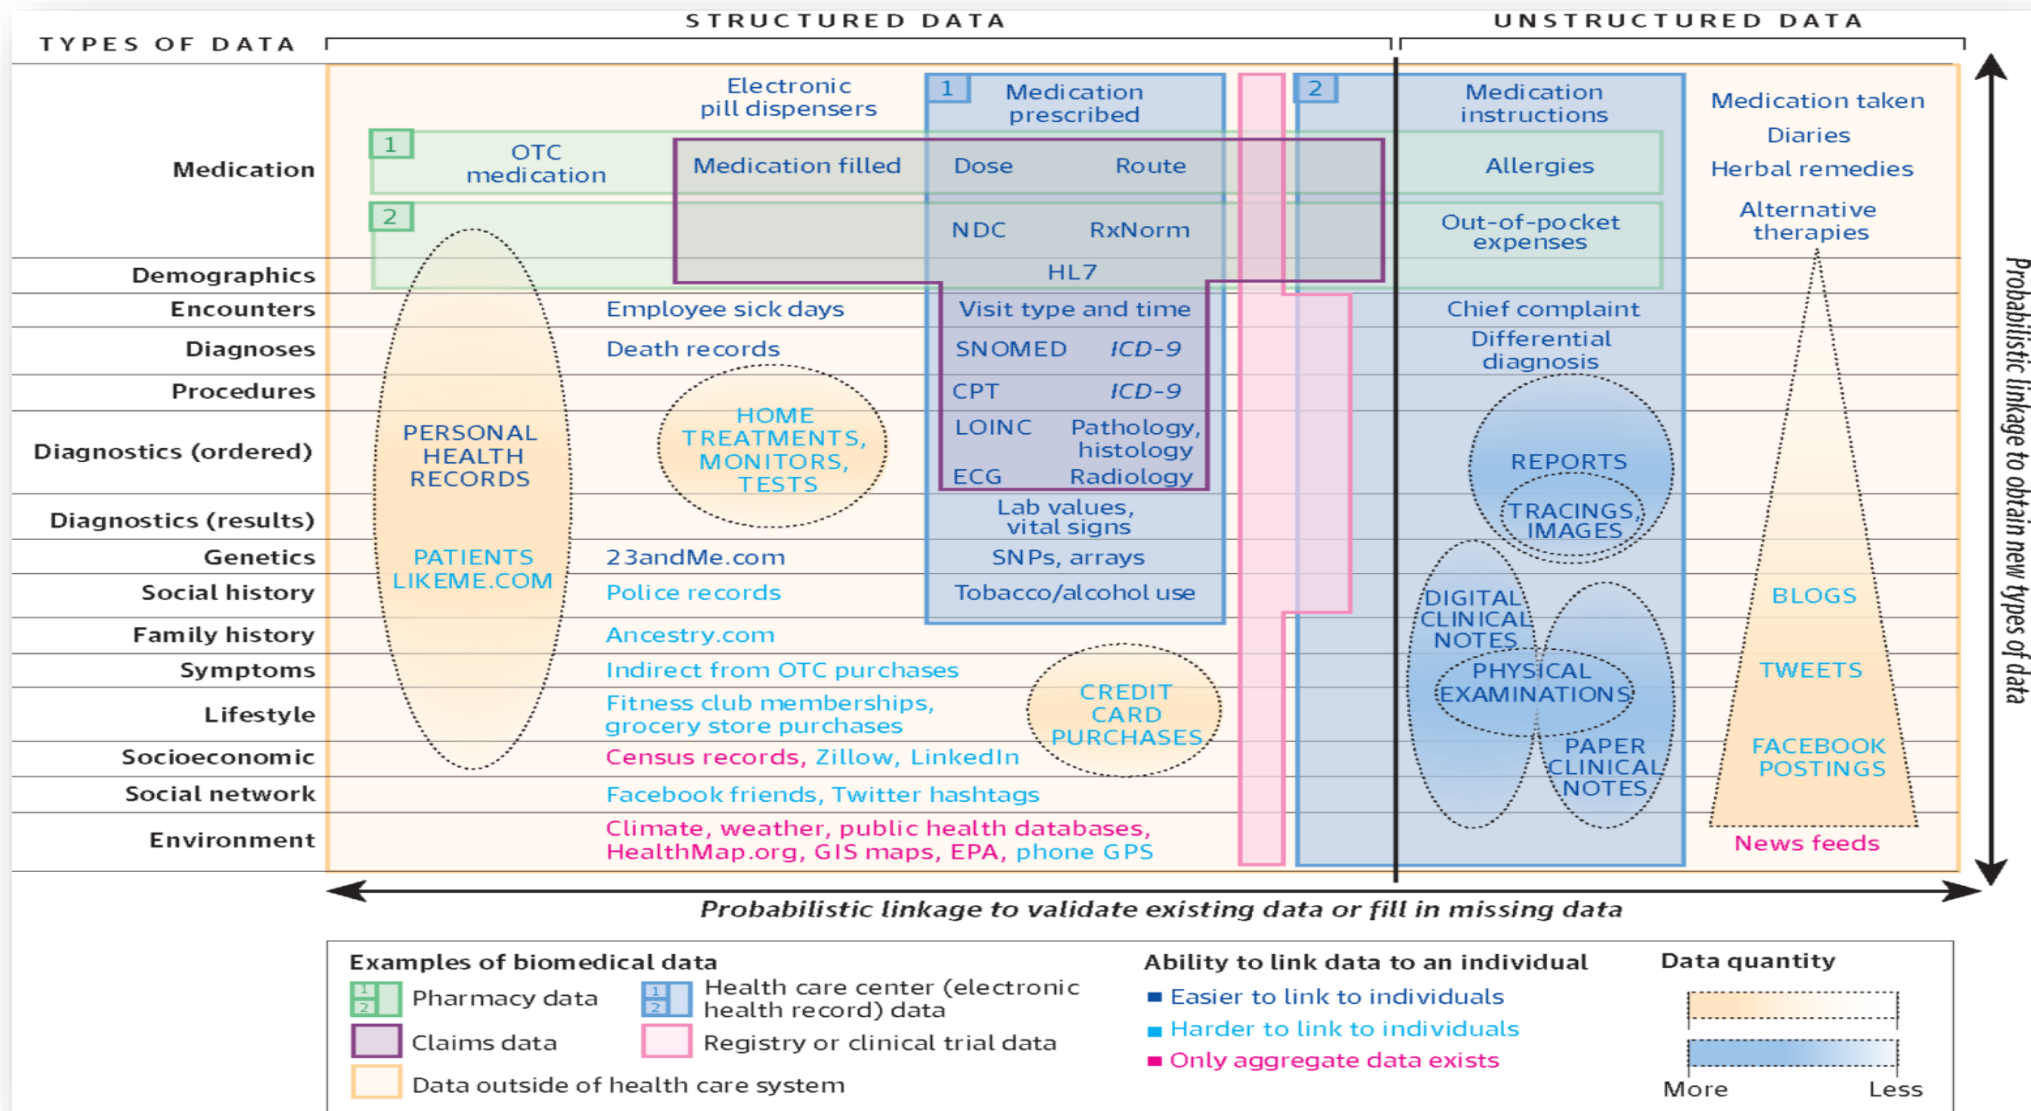

ALL TOO OFTEN REAL WORLD RESEARCH IS A CHALLENGING JOURNEY....

2

IT'S GOING TO TAKE ALL SORTS OF DATA....

3

We need fully transparent and reproducible pipelines that enable large-scale federated analyses across Europe.

WHY IS THIS NOT CURRENT PRACTICE?

Link to data

Analytical method

The data...

What will it require?

Data interoperability

Standardised analytics

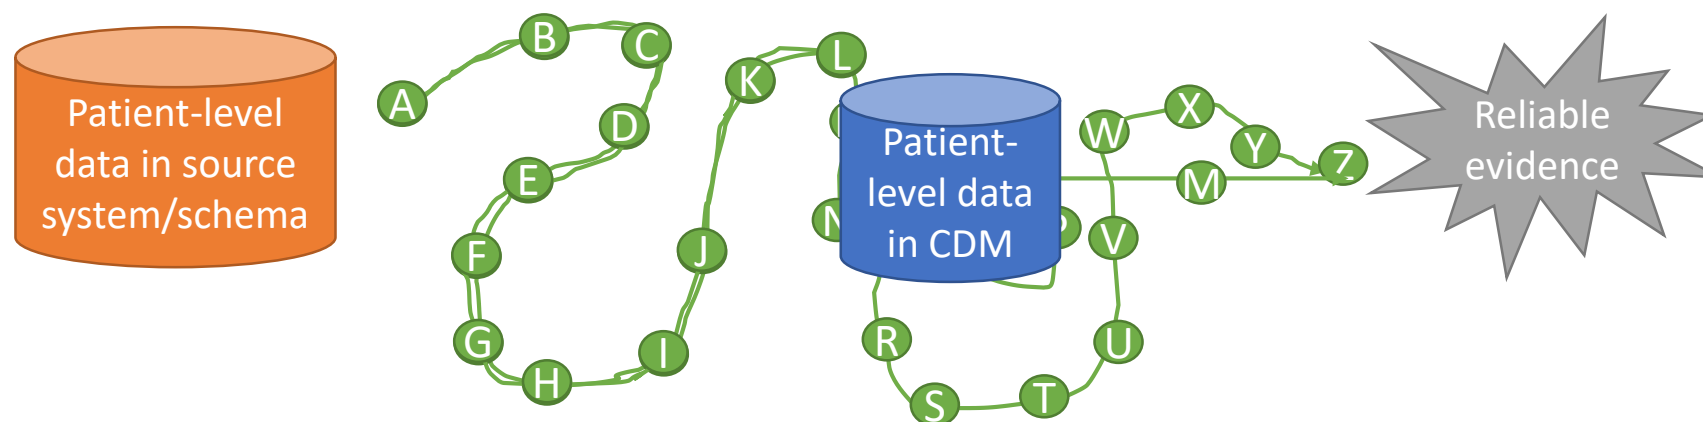

Data network

Strong community

EHDEN will build on expertise and tools from prior IMI projects, such as EMIF, and will collaborate intensively with the global OHDSI community.

WHAT WE NEED IS INFRASTRUCTURE AND A NETWORK TO CONDUCT REAL WORLD RESEARCH IN THE 21ST CENTURY....

7

than an airline....’*

Anon, Conference Participant, 2019

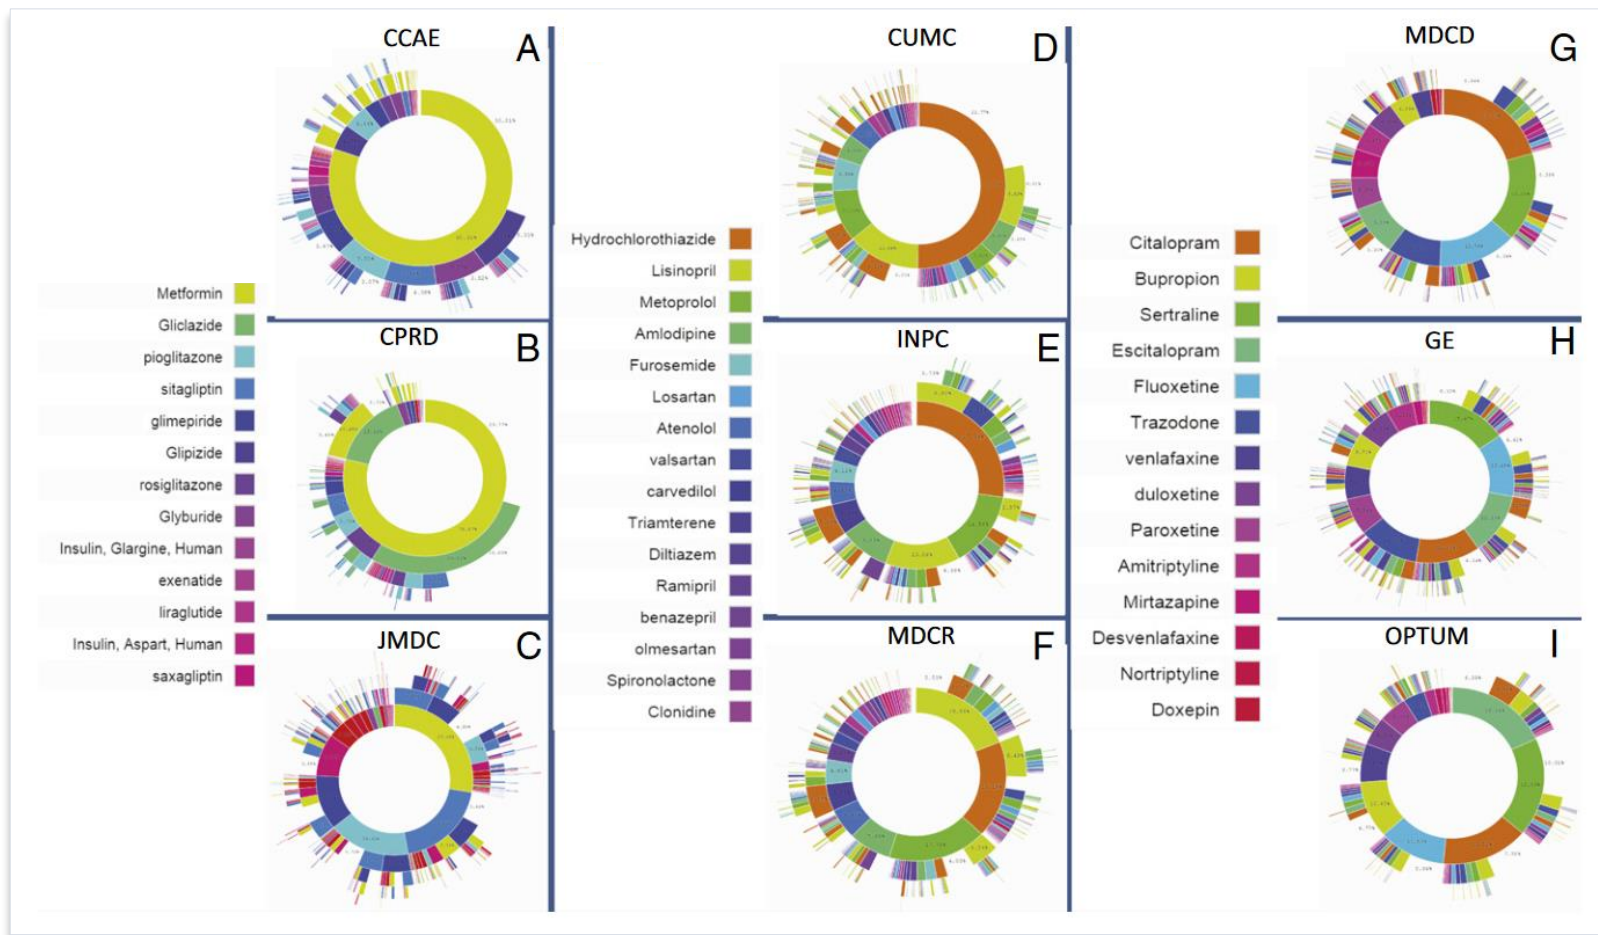

LARGE-SCALE OBSERVATIONAL RESEARCH IS FEASIBLE

9

T2 Diabetes Mellitus

Hypertension

Depression

11 Data sources

4 Countries

> 250 million patients

“Characterizing treatment pathways at scale using the OHDSI network.”

George Hripcsak et al. - PNAS (2016)27:7329–7336

LARGE-SCALE OBSERVATIONAL RESEARCH TO INFORM GUIDELINES

10

Uncertainty remains about the optimal monotherapy for hypertension, and RCT data is lacking

LEGEND-HTN – a systematic, large-scale study under a new-user cohort design; 3 primary outcomes (AMI, Heart Failure hospitalisation, CVA), 6 secondary outcomes & 46 safety outcomes

1st first line role of thiazide or thiazide-like diuretics under appreciated in current guidelines

Estimated 1.3 CVS events avoided for every 1000 patients THZ vs ACEi

9 Data sources
6 Claims
3 EHR

4 Countries

4.9 million patients

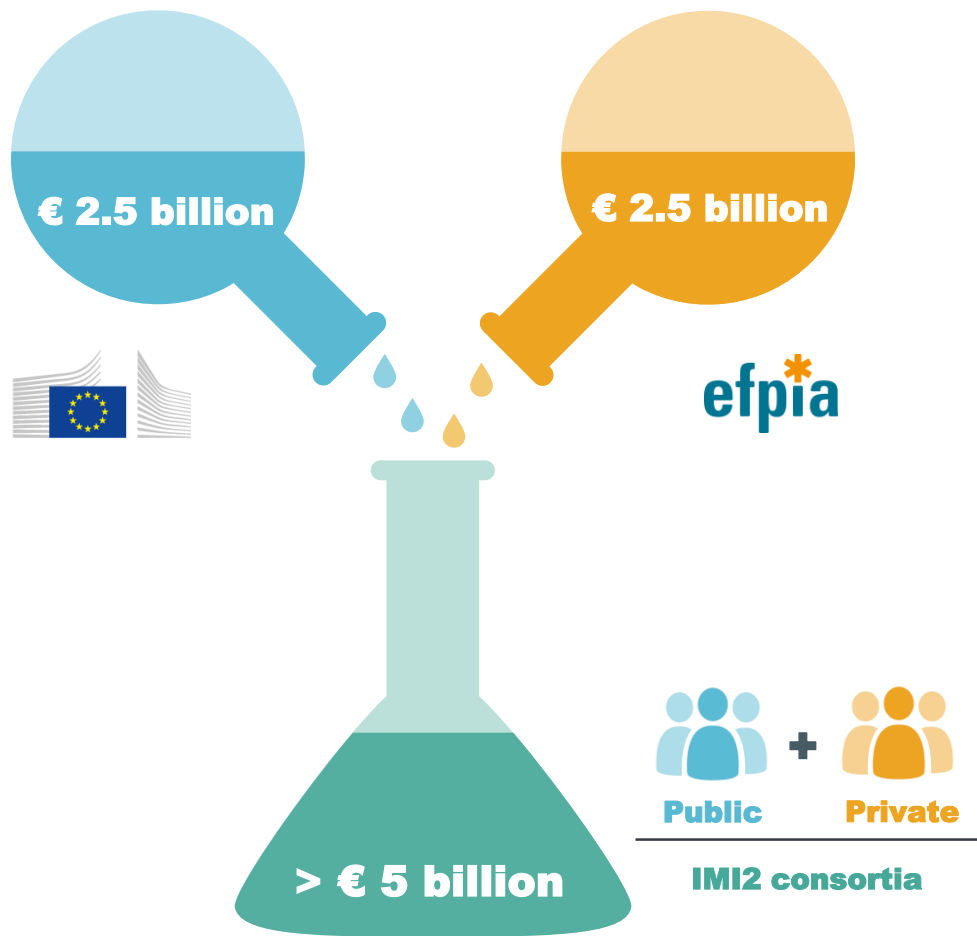

Equivalent to 22,000 observational studies

“Comprehensive comparative effectiveness and safety of 1st line antihypertensive drug classes.”

Suchard MA, et al. – Lancet (2019): online 24 Oct

Carlos Moedas

EU commissioner for research, science and innovation

***“Radical collaboration** where multinational companies work together and share data instead of keeping it secret is helping to change the model of the pharmaceutical industry and solve problems more quickly.”* ([Source](#))

Accelerate research and development.

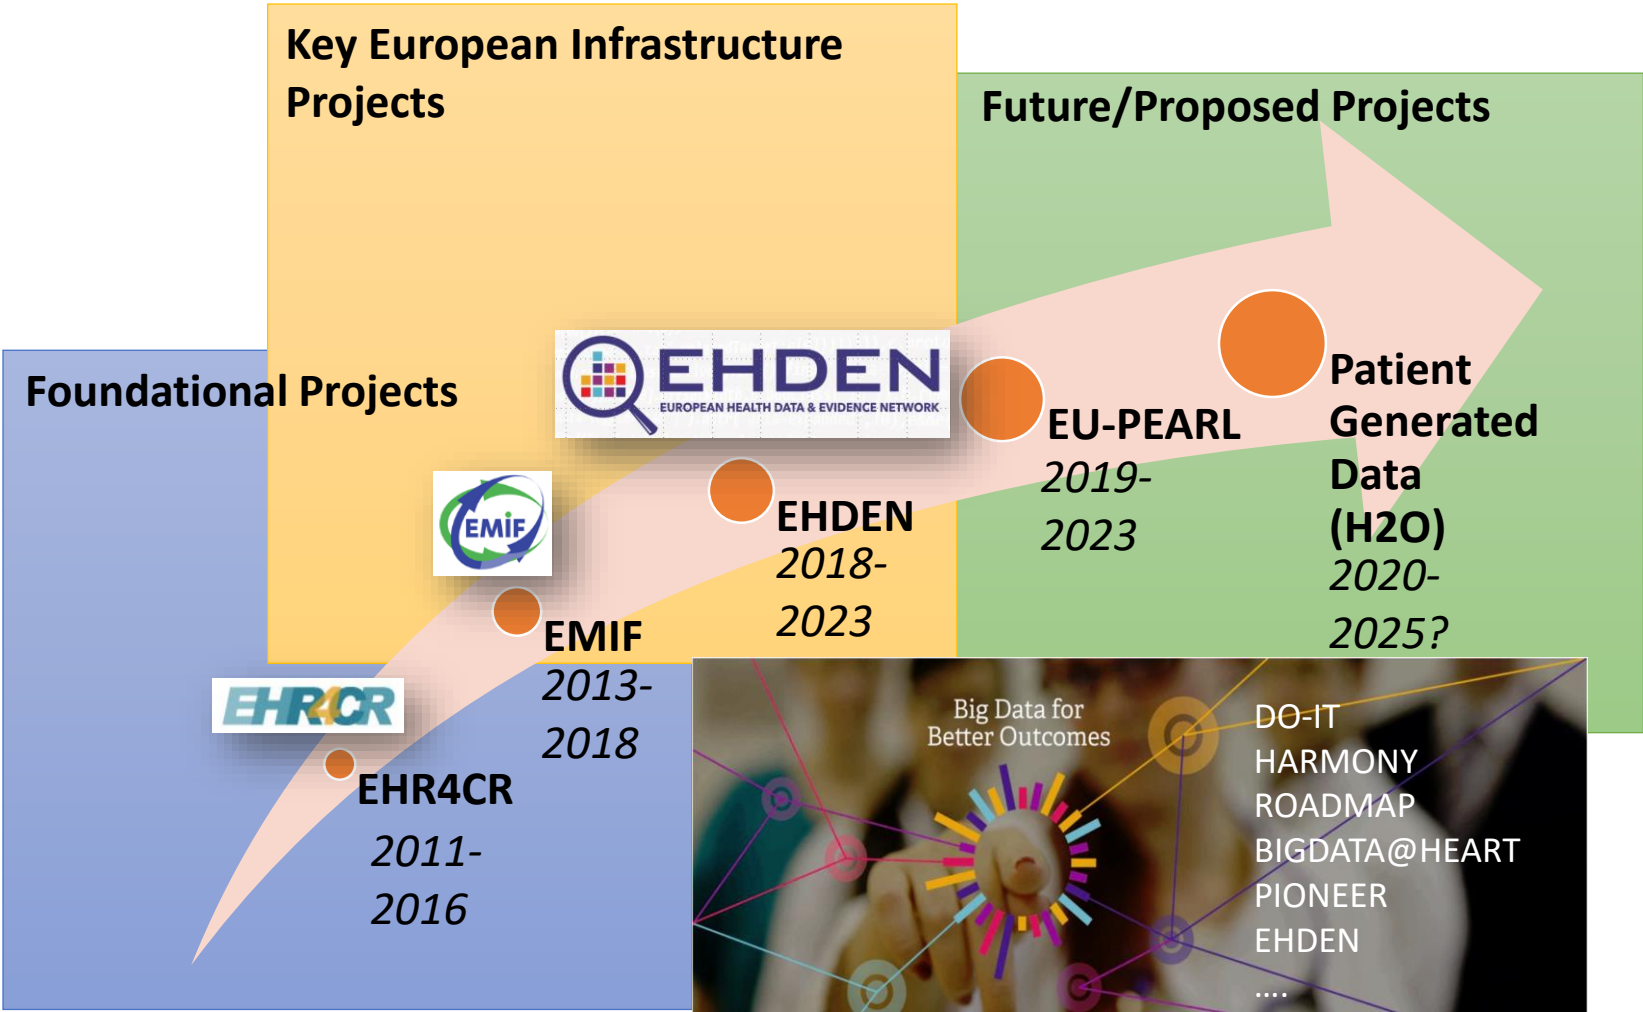

Speed up patient access to innovative treatments.

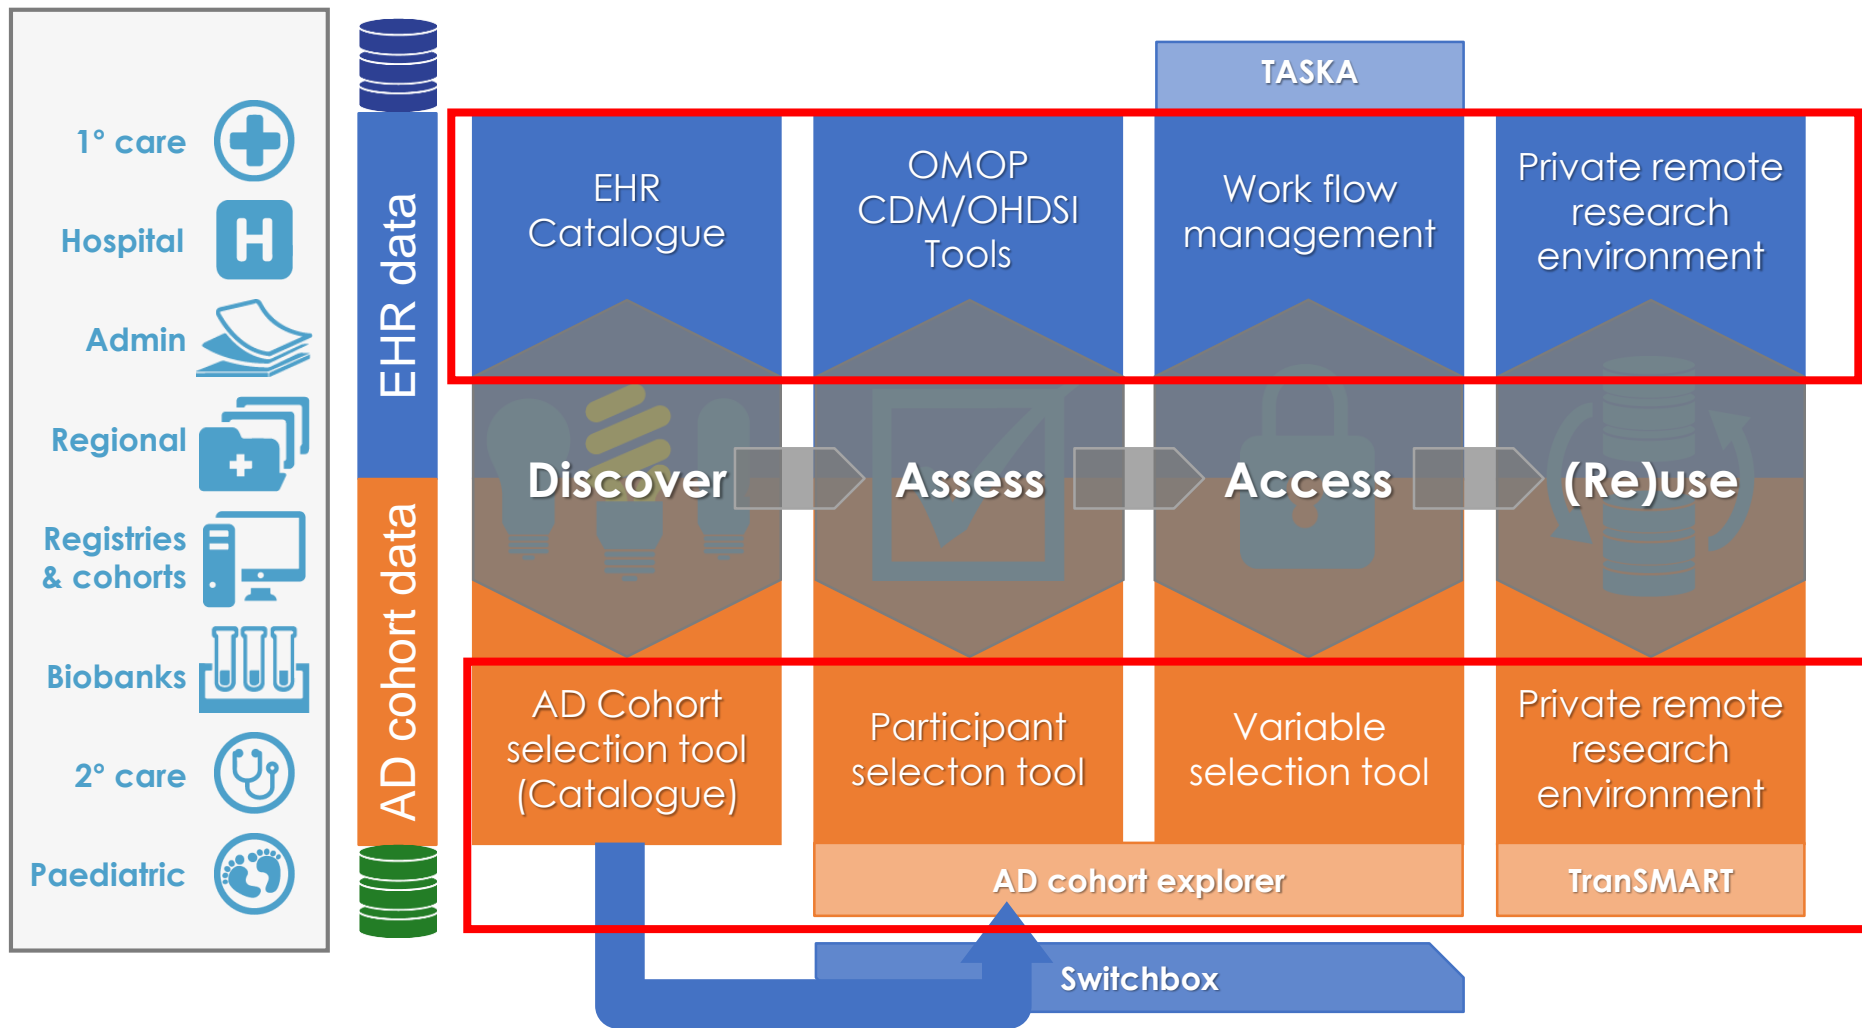

Improve patient outcomes and safety of medicines.

- EH DEN will utilise the technology framework from IMI1 EMIF, with key partners in both projects
- Innovation will continue to scale the architecture, develop new tools and incorporate the OMOP CDM and OHDSI tools more extensively
- Open science, open source technology is a main driver for IMI projects, inclusive of EH DEN

Elements of the EMIF EHR Platform will be used for the EH DEN architecture

EMIF-AD will be a spin-out from EMIF in 2019, supporting the AD research community

Vision

The European Health Data & Evidence Network (EHDEN) aspires to be the trusted observational research ecosystem to enable better health decisions, outcomes and care

Mission

Our mission is to provide a new paradigm for the discovery and analysis of health data in Europe, by building a large-scale, federated network of data sources standardized to a common data model

Start date: 1 Nov 2018
End date: 30 Apr 2024
Duration: 66 months

22 partners

Almost €29 million

Universities, public bodies and research organisations

Academic
coordinator

SME & Mid-sized companies

ODYSSEUS
DATA SERVICES INC

Non-profit organisations

EFPIA & Associated partners

EFPIA Lead

Regulators

Continuous effectiveness & safety assessment

Payers

Assess cost effectiveness

Determine reimbursement

Patients

Understanding benefits and risks

Improvement of care

Better patient outcomes

Research

Understanding diseases

New indications

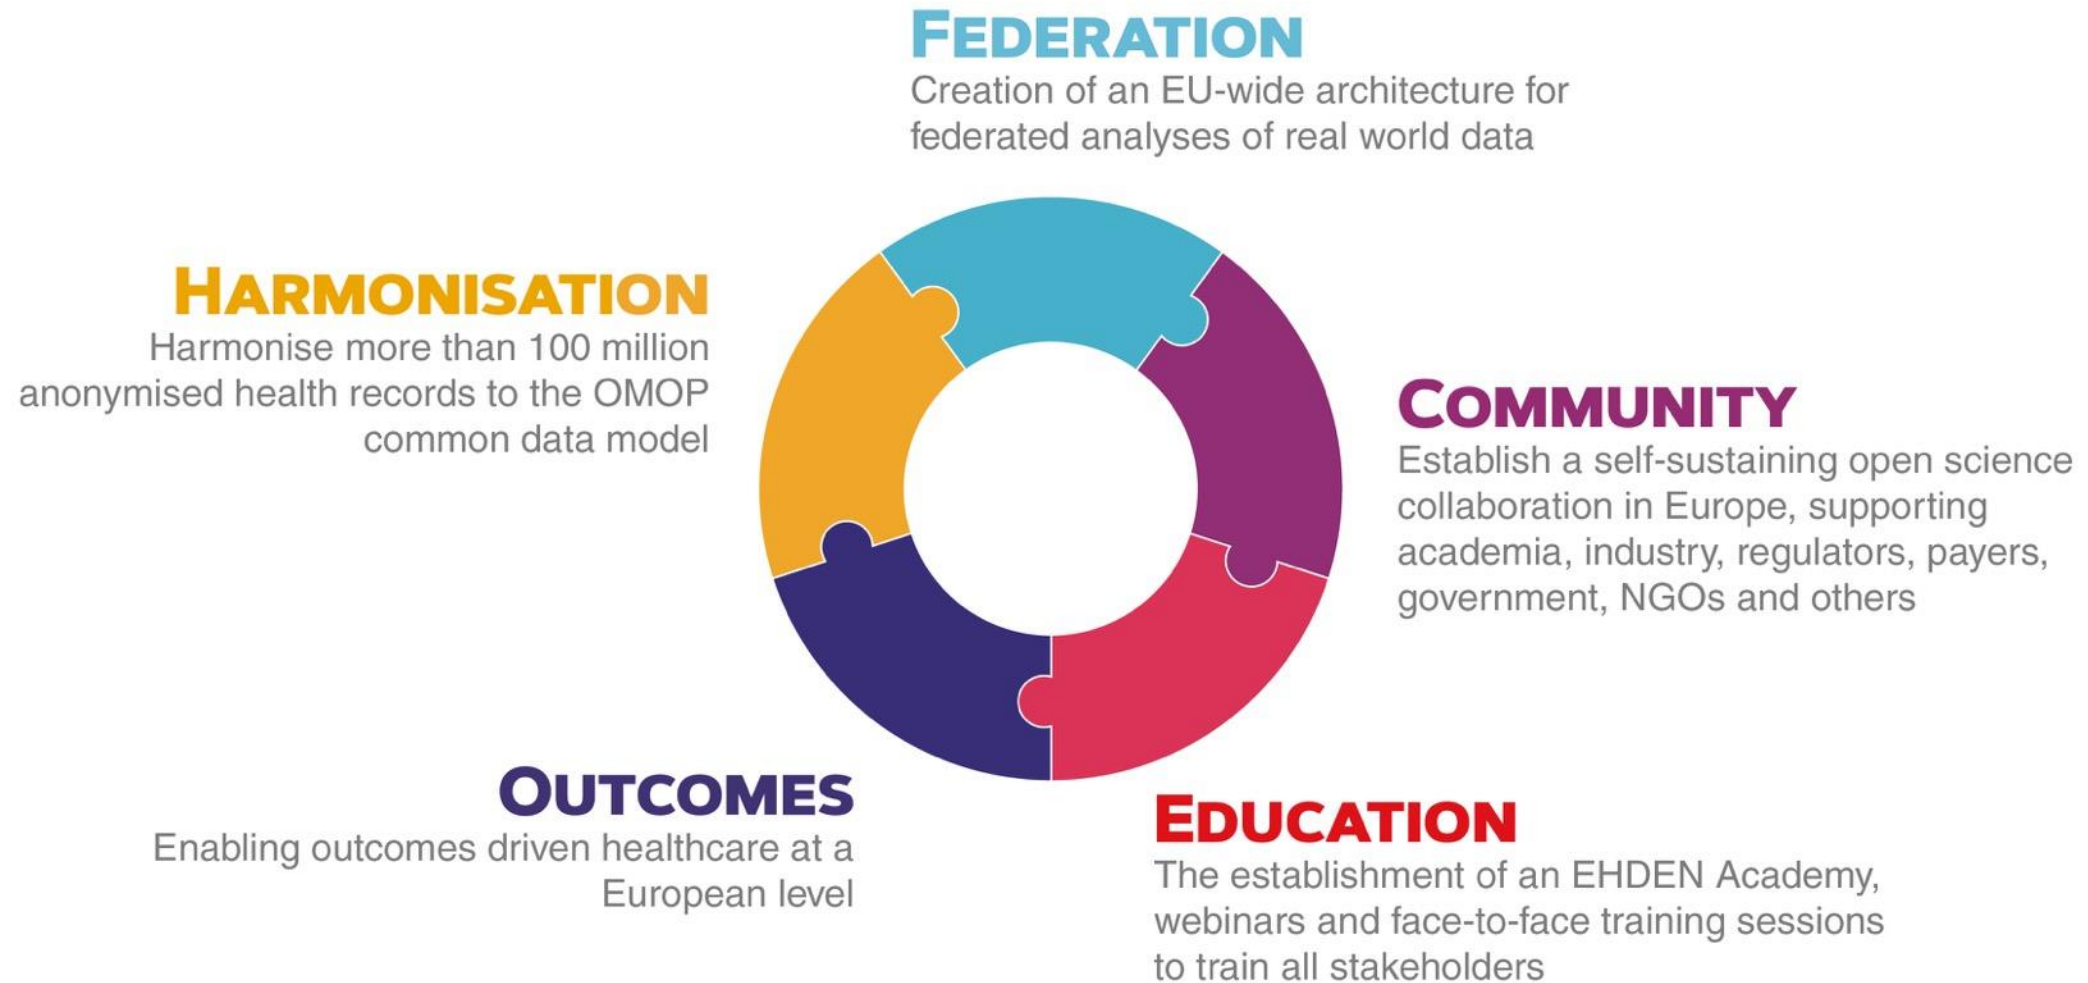

Development

Trial design and feasibility

Demonstrating value

Infrastructure

Creation of an **EU-wide** federated network architecture

Privacy by design

Data harmonisation to the OMOP common data model

Training & certification of **SMEs**

Research & Outcomes

Use cases to evaluate the EHDEN federated network

Collaboration on consistent **methodologies**

Collaboration with the global **OHDSI** research network

Incorporation of the **ICHOM** health outcome standards

Education & Community

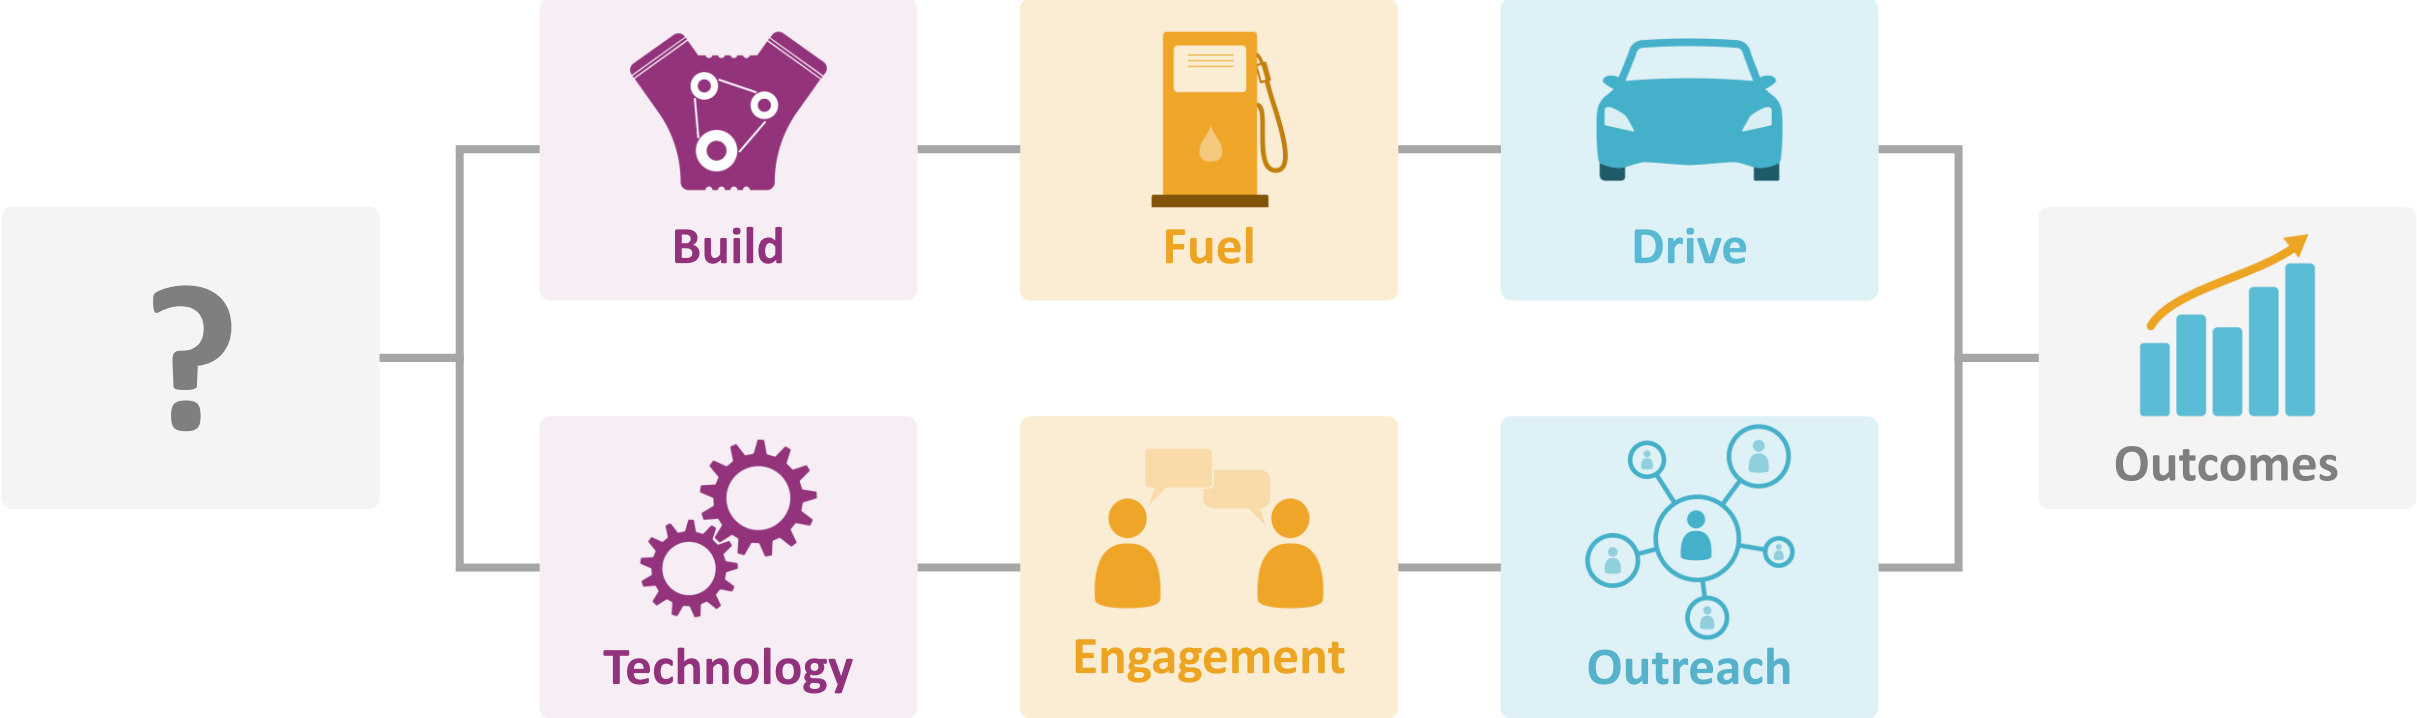

Establishment of an **EHDEN Academy**

Expansion of the **OHDSI** network in Europe

Collaboration on **collective memory** for research use cases

WP1: Evidence Workflow Development

Incorporating the use cases for supporting development and validation of the EHDEN socio-technical approach, inclusive of BD4BO projects

WP2: Outcome Driven Healthcare

Related to all activities specific to e.g. BD4BO projects outcome focus, and ICHOM standards incorporation

WP3: Personalized Medicine

Focusing on the support of outcomes/value based healthcare, inclusive of clinical prediction models, with the incorporation of 'novel' patient data

WP4: Technical Implementation

Key priority is socio-technical development of the EHDEN federated framework and relevant services

WP5: Data Workflow Implementation & Service Deployment

Development, oversight and evaluation of the ecosystem development from SME qualification/certification to data source engagement, OMOP CDM mapping and evaluation

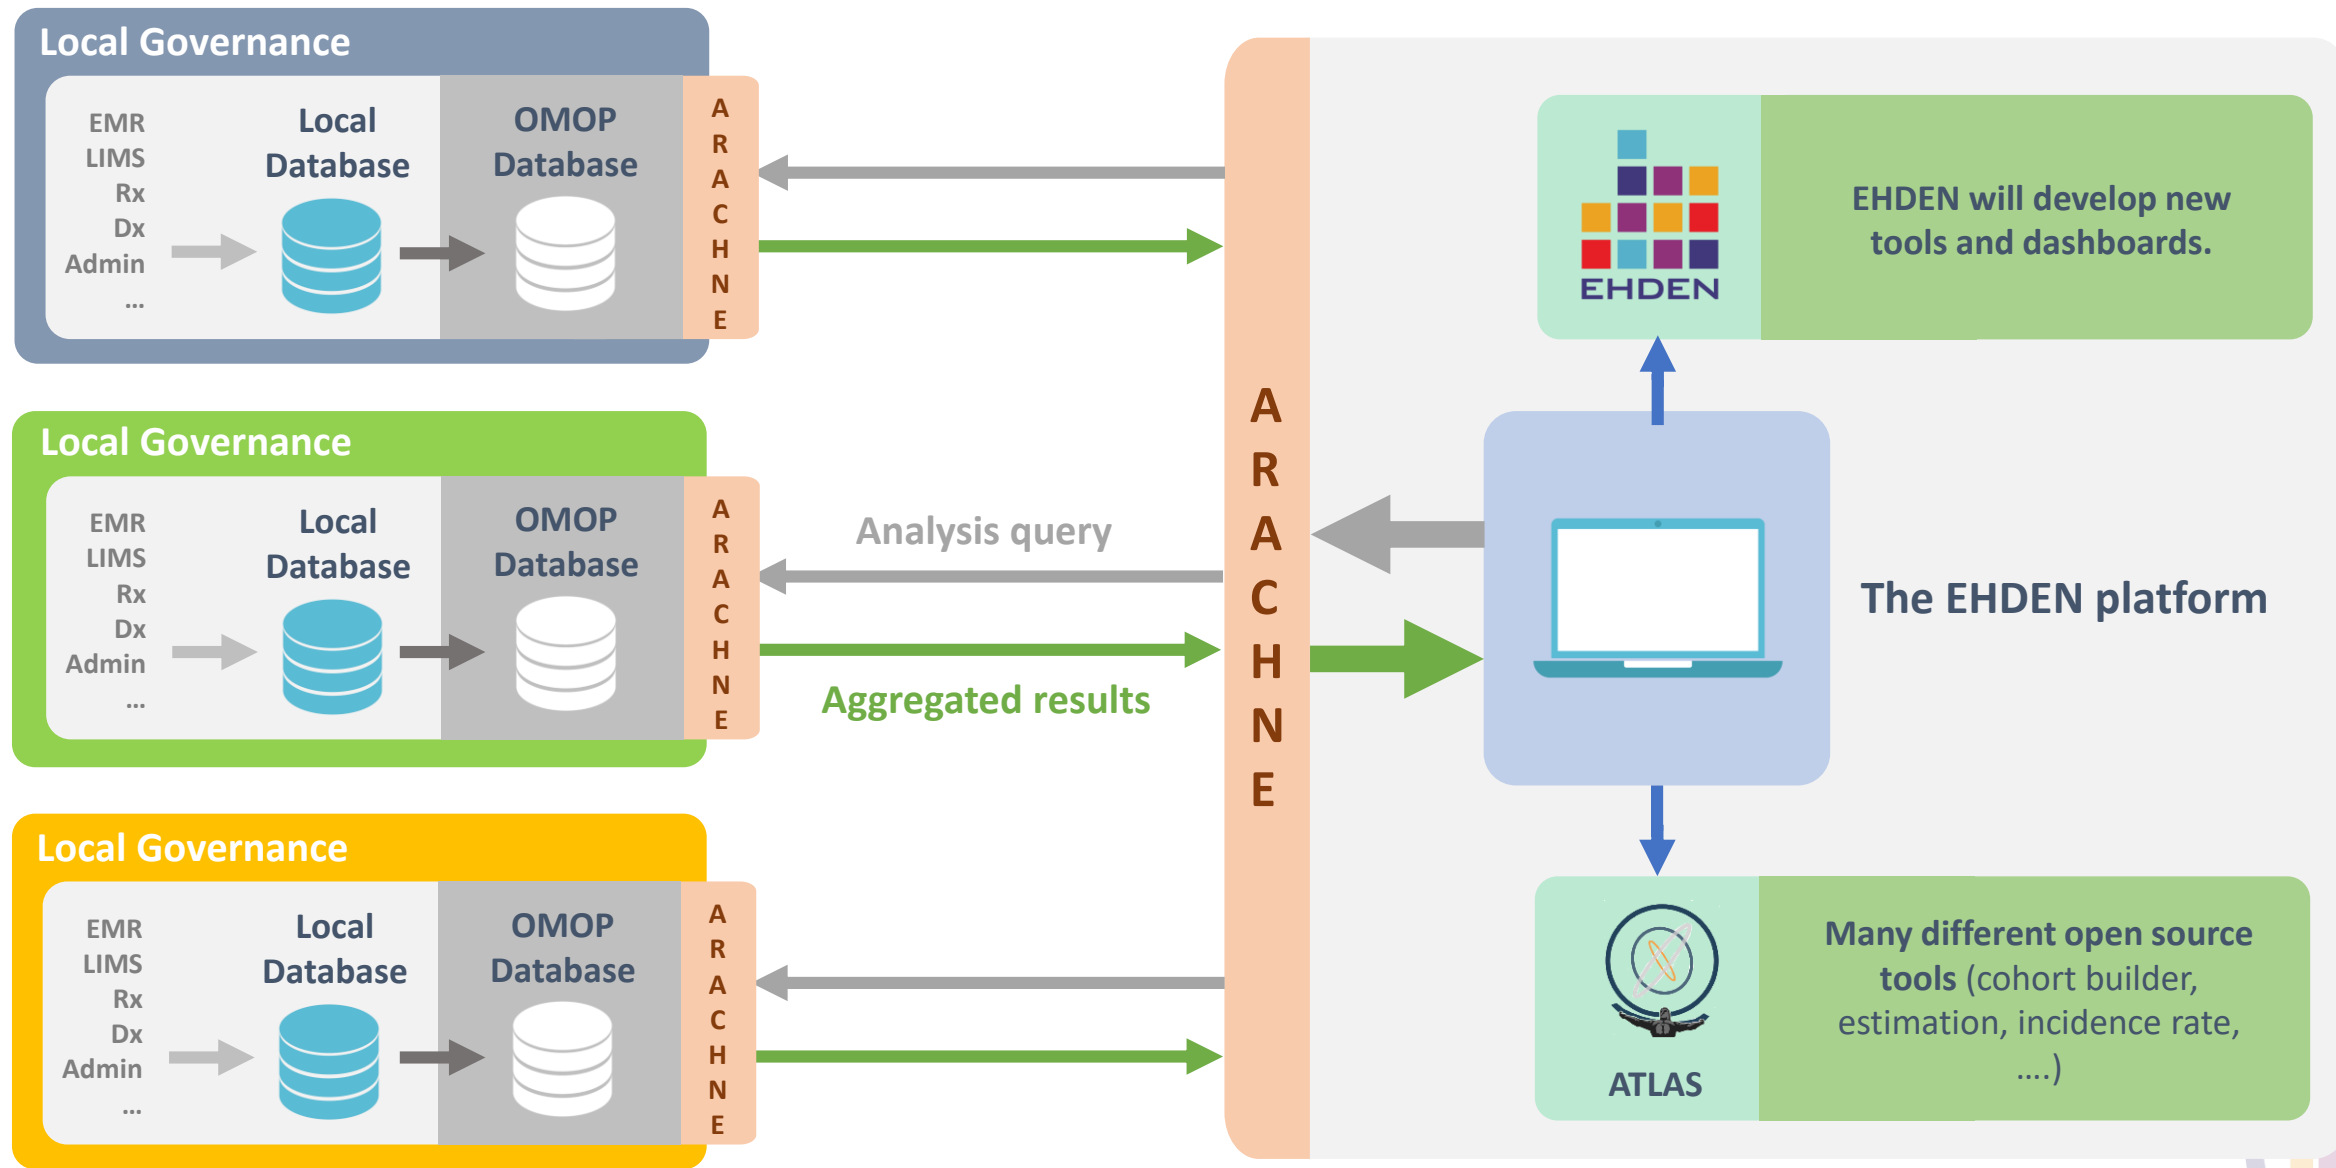

WP6: Outreach and Sustainability

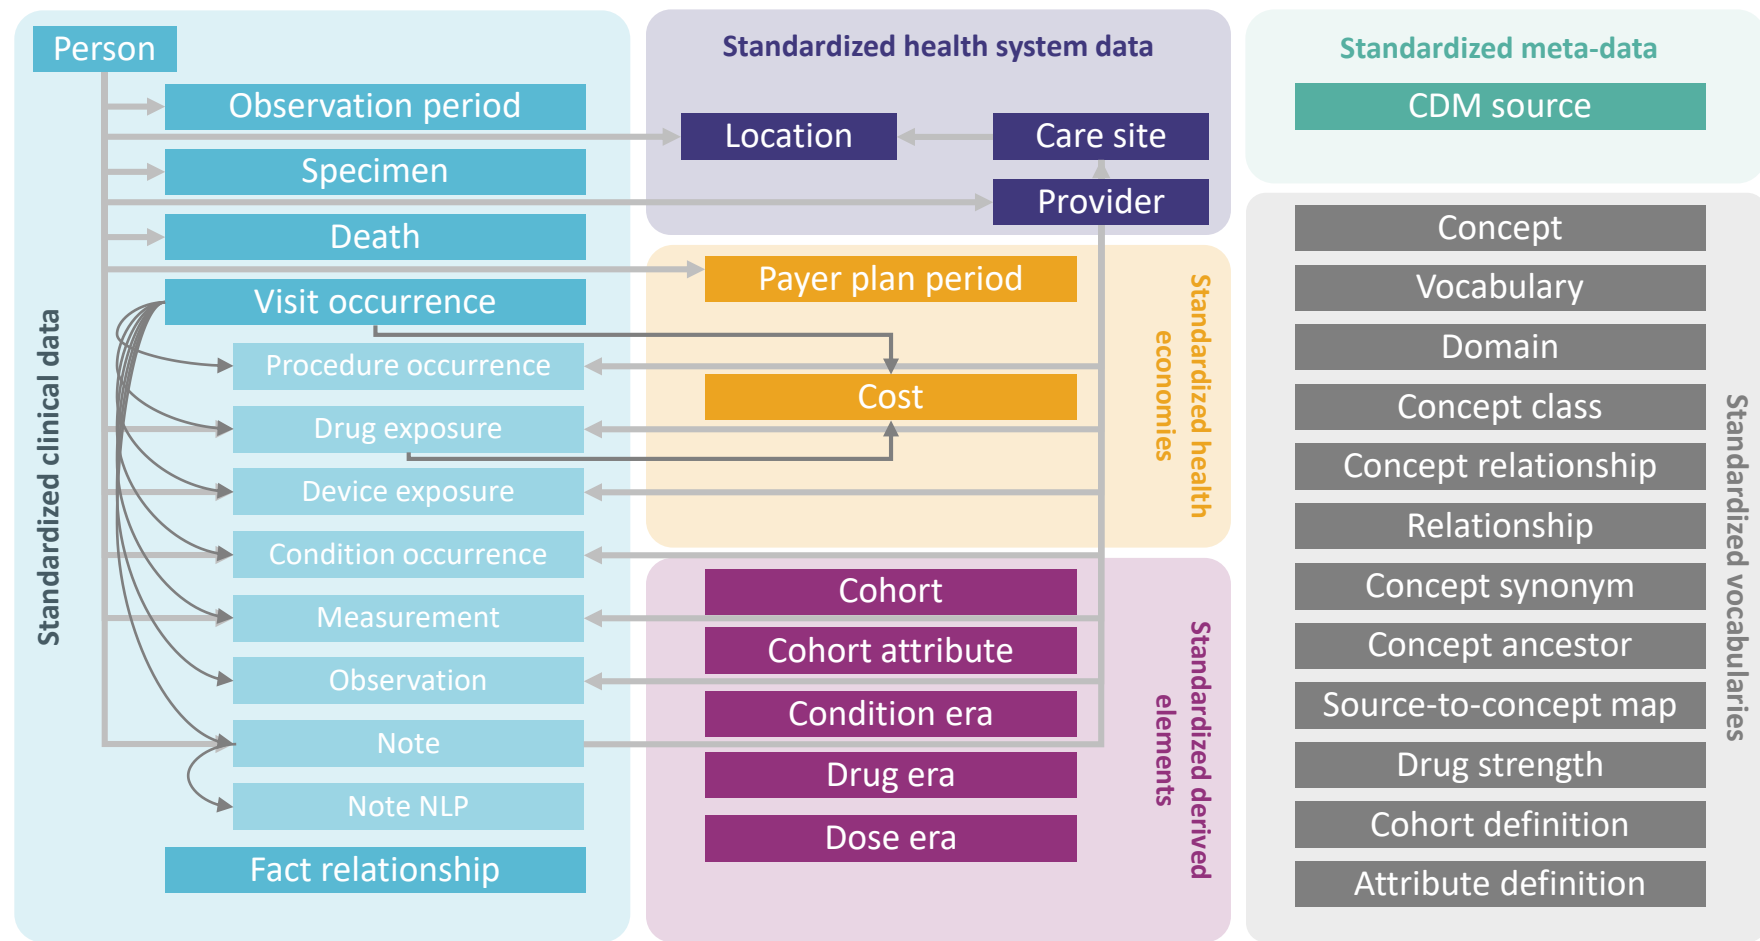

Ensuring the development of value propositions for key stakeholders, and developing the sustainable operational model for EHDEN during and post IMI phase

WP7: Project Management and Dissemination

Concentrating on intra-project project management, internal communications and external dissemination, and responding to IMI deliverables

Patient-centric
Tabular
Extendable
Built for analytics
Relational design

Collaborators

Main developers
of many of the
OHDSI tools are
EHDEN partners

ATLAS

Mapped data sources are encouraged to be active members of the **EHDEN community**, participating in **research studies**.

SME PILOT CALL

Open Call

Submission of applications for the open call for SMEs from the 1st of April until the 1st of May (17h00) via the EHDEN website.

Evaluation

Following an eligibility check, applications were evaluated by the SME certification committee.

Training & Certification

Certification and training of selected SMEs in all necessary competencies.

34 SME profiles made

28 Eligible applications

11 SMEs initially selected

2020 CALL TIMELINES

The success of EHDEN will only be based on **trust** and **relevance**

Openness, transparency and **collaboration** will be key drivers for trust

Relevance needs to be based on relative **usefulness** of data, research **outputs** and **accessible** technology

Ultimately, trust and relevance are based on **successful outputs**

Compliance with citizen and data protection regulations

Further development of the EMIF Ethical Code of Practice

Ethical Advisory Board

Privacy by design
(data remains local)

Evolving framework for data protection

Use Case 1 – Drug utilisation study

Validate the OMOP CDM in European data sources comparing results from source versus OMOP data

Use Case 2 – Drug and device safety study

Test and further develop existing (OHDSI) population-level estimation and population-level prediction packages in EU Data sources

Use Case 3 – HTA study

Assess whether data commonly used for HTA purposes can easily be measured and analysed using the OMOP CDM

“To compare the **risk** of post-operative **complications** and **mortality** between unicompartmental vs total knee replacement.”

Monday

Group consensus on the **problem**
Draft cohort definitions

Wednesday

Review patient-level prediction results
Externally validate prediction model

Friday

Review of results
Plan for completing **publications**

Tuesday

Review clinical characterisation
Draft patient-level prediction design

Thursday

Draft population-level effect estimation design
Review population-level effect estimation diagnostics

Aim

To develop an **e-learning** environment to **train all stakeholders** on the use of the tools and processes that are being adopted within EHDEN and OHDSI.

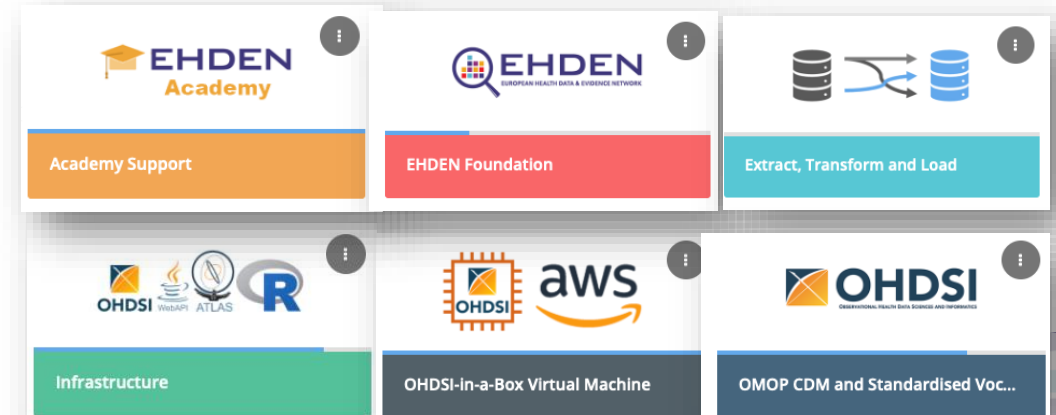

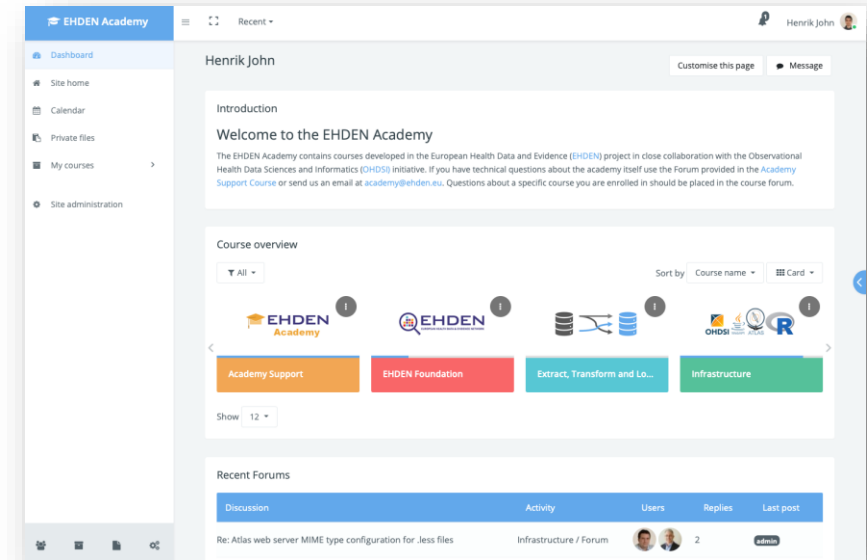

Collaboration

Course development on the OMOP Common Data Model and the rich set of OHDSI tools that are being developed in collaboration with the **OHDSI community**.

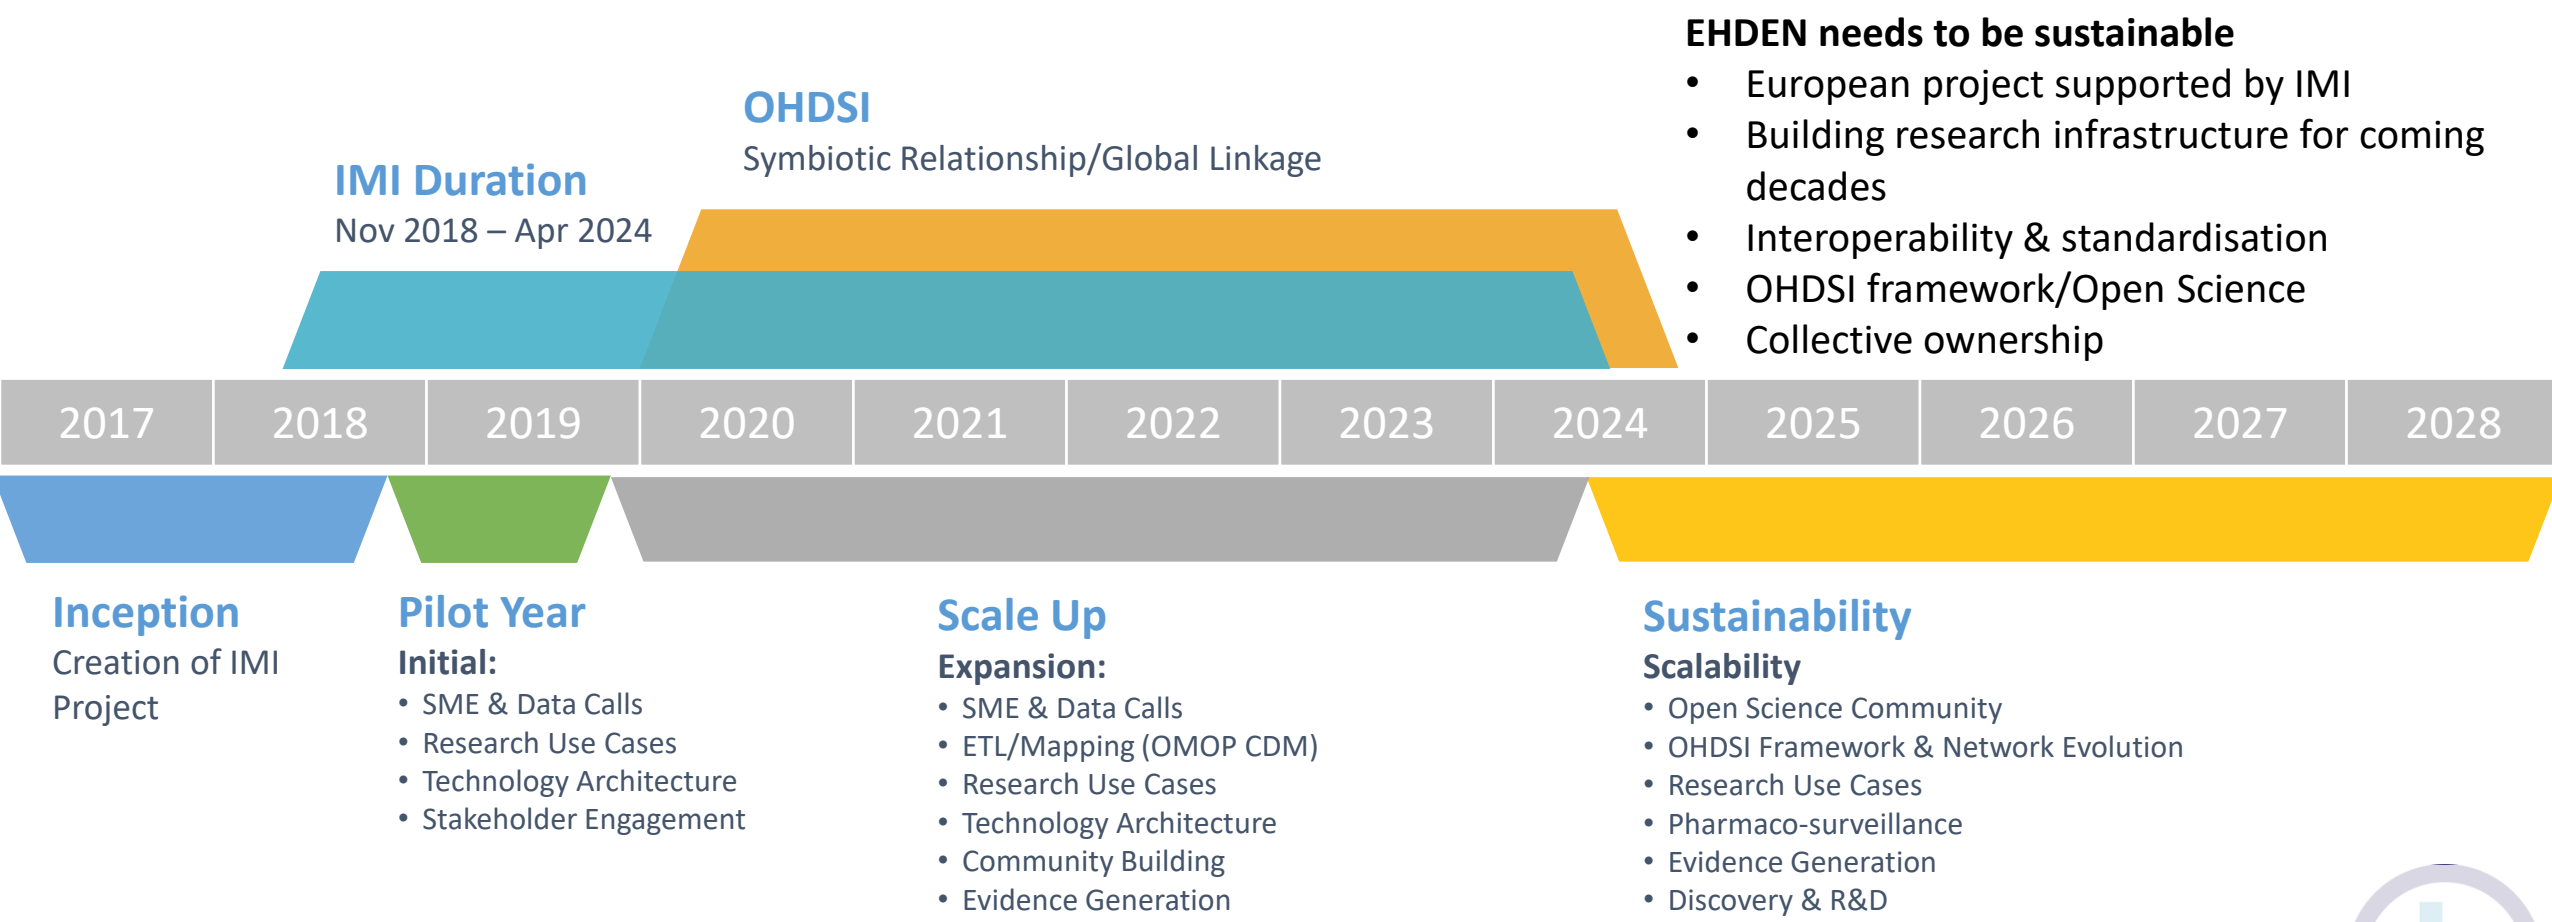

Infrastructure

The EHDEN Academy is developed in **Moodle** and is hosted in the **Amazon AWS cloud**. We use virtual machines for assignments.

THE DEVELOPMENT & MILESTONES OF THE EHDEN PROJECT

COVID-19

**Rapid Collaboration Call for data partners
wanting to map their COVID-19 patient data
to the OMOP common data model**

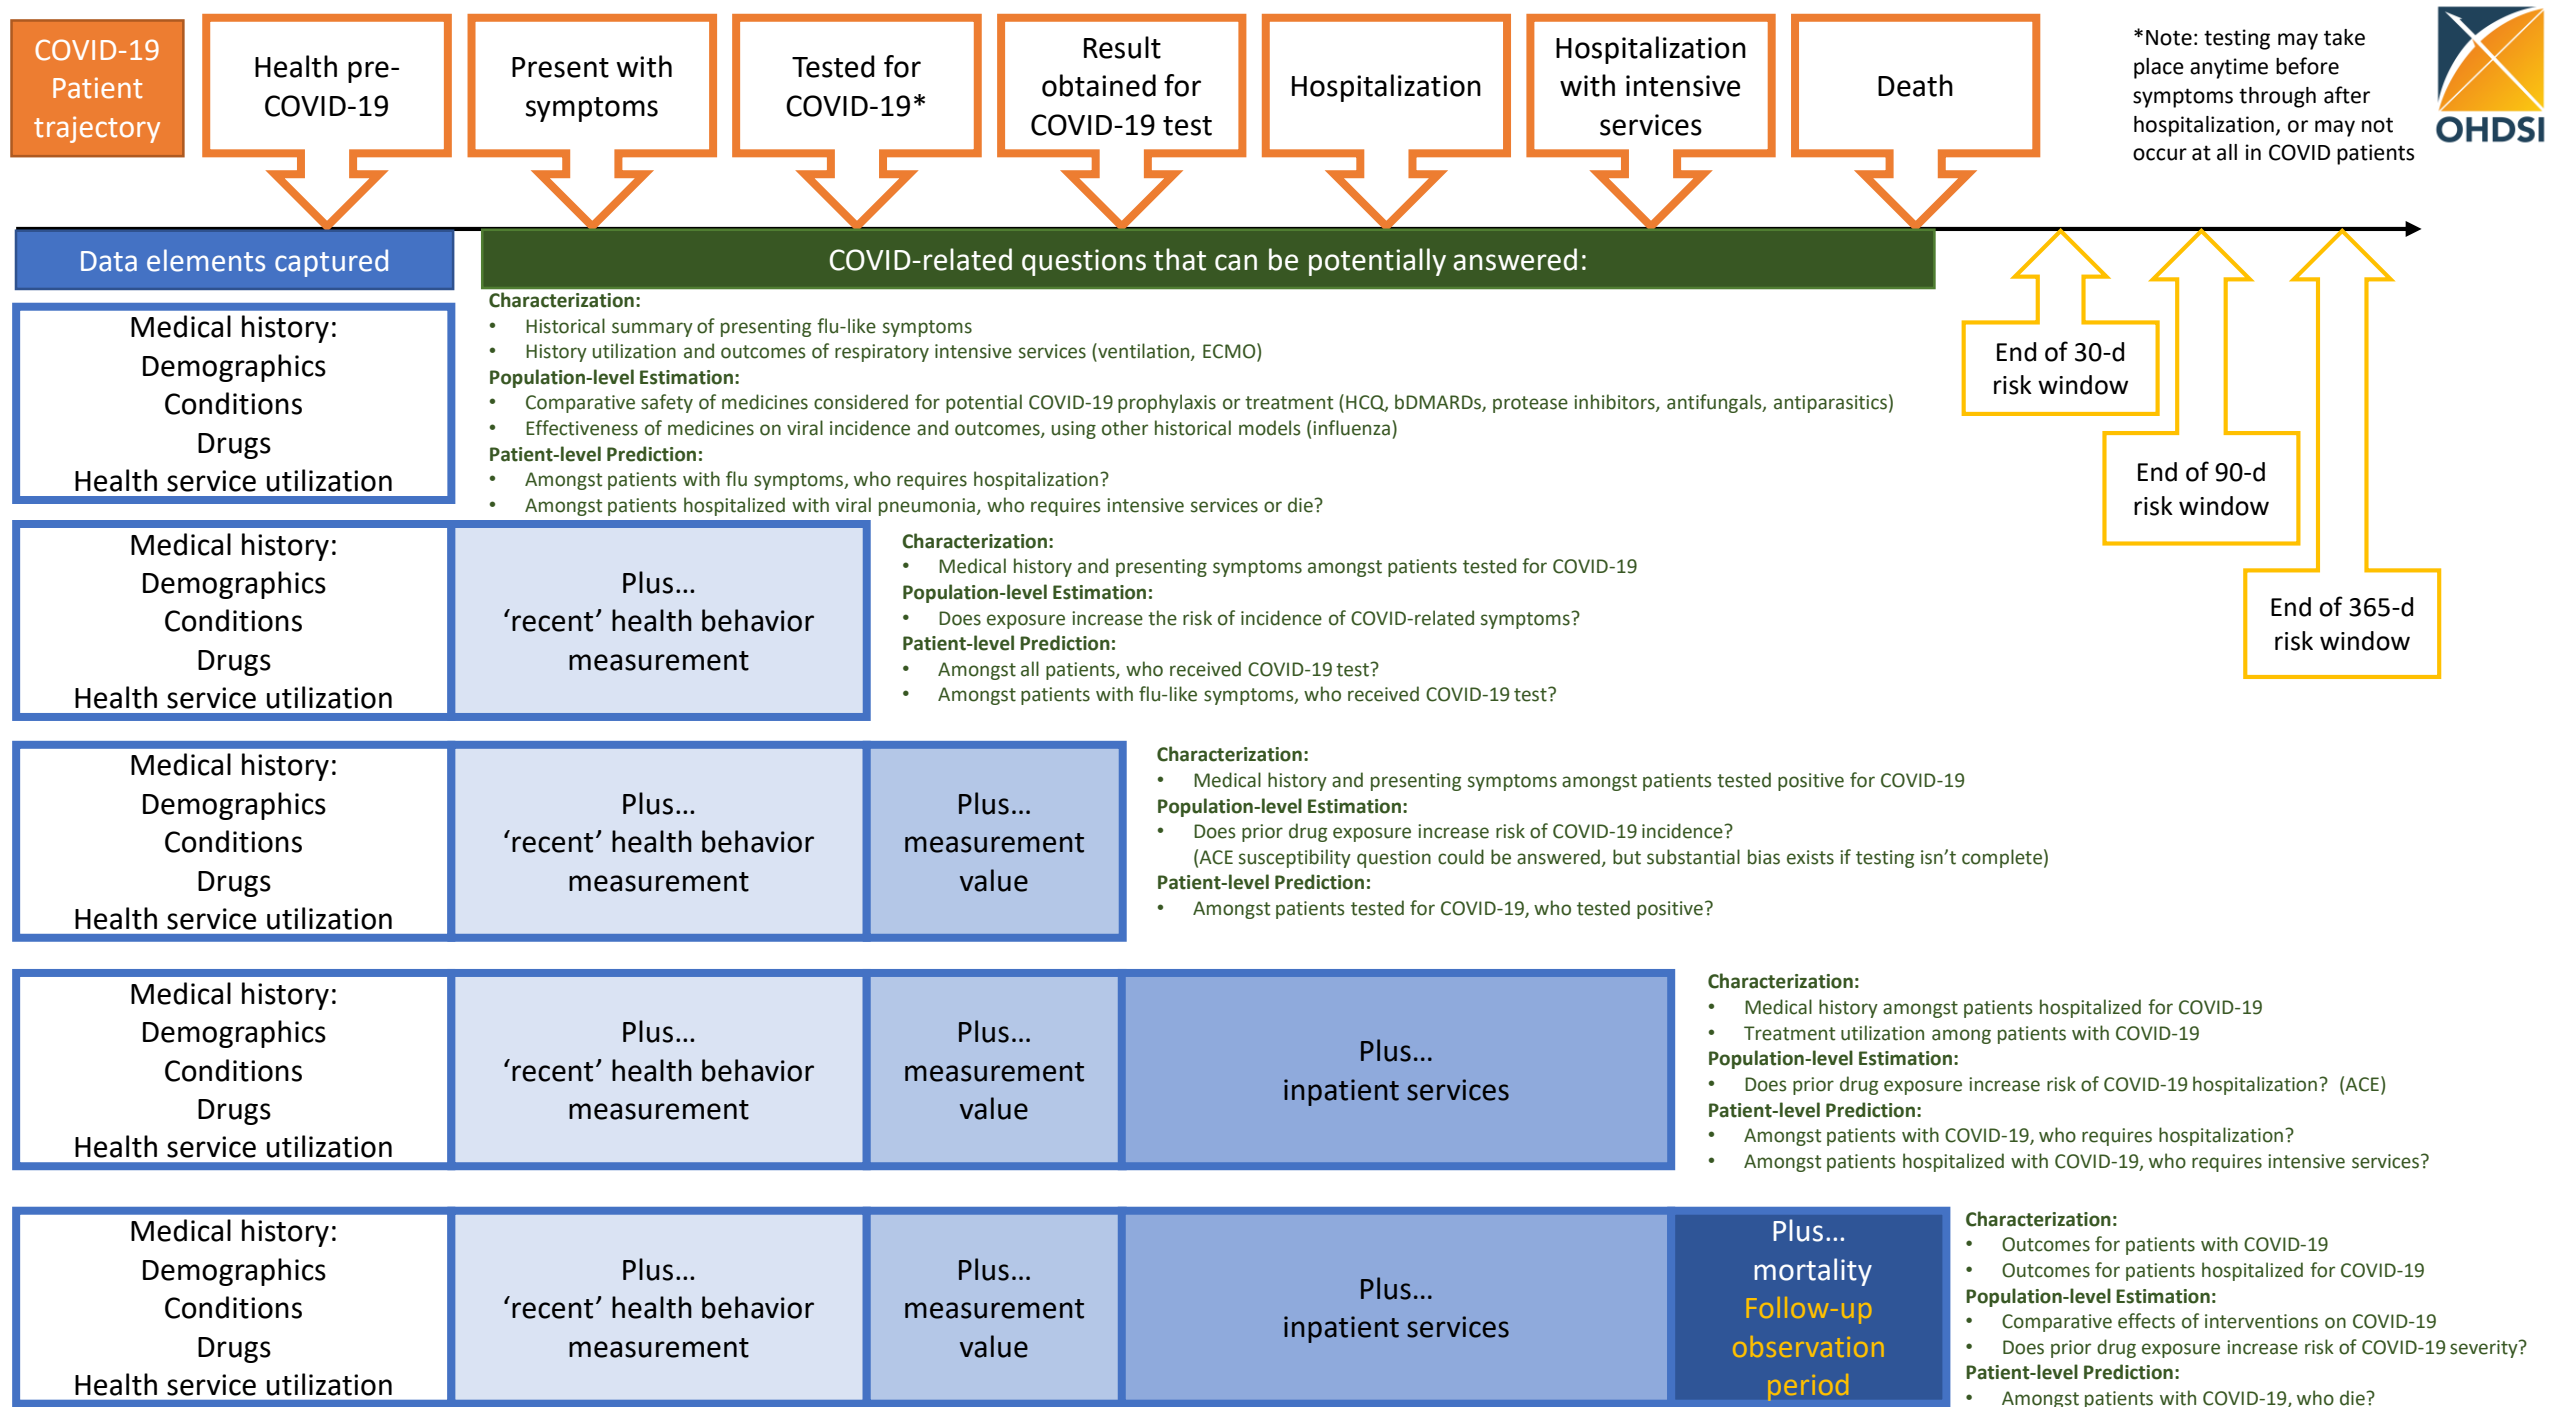

- Mapping performed by **EHDEN Task Force**
- Up to **50 000 €** grant to cover expenses
- Rapid evaluation & turnaround

April 16th - May 14th

 **EHDEN**
EUROPEAN HEALTH DATA & EVIDENCE NETWORK

*Note: testing may take place anytime before symptoms through after hospitalization, or may not occur at all in COVID patients

- EHDEN is a bold step in recognising that a flagship project is needed to address conducting real world research for the 21st Century
- At its heart is the acknowledgement that we need to develop a community via a federated network, within an ecosystem, all based on a *quid pro quo* around data for research use
- The Open Science/Open Source community of OHDSI, and the OMOP CDM are critical enablers and partners for EHDEN in this endeavour
- Watch out for *#DataSavesLives*....
